

CBOA

Collegiate Basketball Officials Association

CBOA was founded in 1948 (70 years ago) by a group of influential basketball referees to represent officials before the days of the NCAA and conferences as we now know them. The organization has changed with the times and become an optional membership striving to help referees and the game of basketball grow. The only change we have not made is an Annual Dues increase. It is the same \$50 yearly dues now as it was back in 1951!

What benefits do the officials receive from CBOA?
